# ANOTHER MINE BEING WATCHED

Changes in Silver King Con. Shaft Premonitory of Ore.

### LEASING AT MAMMOTH MINE

COLUMBUS CON. SELLS ONE LOT OF ORE FOR \$20,000.

While it is a little early to begin talking "strike" for the Silver King Consolidated at Park City, Manager Solon Spiro, who returned from a flying trip to that property and the Little Bell last evening, says that a change is taking place in the bottom of the shaft that is premonitory of something to come before long. The rock through ing "strike" for the Silver King Concome before long. The rock through which the drills are now gnawing their

which the drills are now gnawing their way is so heavily copper stained that it is as green as grass.

"Everything at the mine is now in splendid shape for the campaign ahead of us," said Mr. Spiro, "and as there is no water to contend with other than the small amount of seepage that trickles down the shaft from the 800 level, rapid progress in sinking will be trickles down the shaft from the 800 level, rapid progress in sinking will be made from now on. The amount of water now making in the mine is not so large as it formerly was by 50 per cent, and within a few days we shall have everything so tightly corked up on the 800 level that not a particle will find its way down the shaft from there. Superintendent J. H. Keetley and all the boys at the mine are now standing on the tip-toe of expectancy, and all are swinging into harness with a vim and enthusiasm that bespeaks the greatest confidence in what development is going to shortly disclose."

In getting away from the 800-foot In getting away from the 800-foot ation progress was necessarily slow a time after sinking was resumed,

every sense. go into commission next month.

The bulk of the outside ore now be-

ing handled by the Bingham company is materially what has been contracted for long periods to the American Smelting & Refining company. It includes the crude ores of the Grand Central and Boston Consolidated, and the concentrates produced by the Contract of the Grand Central and Boston Consolidated, and the concentrates produced by the Contract of centrates produced by the Cactus and Utah Copper company. All of these products will be handled by the Amer-lean's new works and the Bingham company will be compelled to make up the deficiency from its own mines and those of patrons not under contract to the American or United States compa-

mine is a remarkably steady producer, and the long Dalton & Lark tunnel, which has reached the ore-bearing channels of the Dalton & Lark mine, Brooklyn ledges at great depth. When this is done, the company will be entirely independent of everybody for the ore with which to keep its furnace with which to keep its furnace to the company will be month of October would be. ducing 1,000 to 1,500 tons a day, though there is no question but what it will always be in the market for all classes will receive a generous share of it.

# LITTLE BELL A BONANZA.

#### Manager Says All Is High-Grade Ore at Contact.

Speaking briefly of conditions as he found them at the Little Bell yesterday Manager Solon Spiro stated that the showing was even better than the best reports had made it appear. The contact was reached during the morning and ore of fine quality was disclosed on all sides. As thirty feet or more has been making an examination of a copnow been run without doing any timbering, a cessation of work in the face was ordered by the superintendent until the ground could be put in safe condition. or for the workmen.

nager Spiro that he had never seen twenty to thirty feet. "Just how the ore is aly-West or other mines of the Park pressed the opinion that a bonanza hoot of ore would be opened at the function of the fissure and contact and he had not the slightest doubt that he tion I found to the proper could go up on the 300 lovel, 4000 feet tance from the railroad." above, and repeat the performance. There are yet two contacts to be cut in that partion of the company's ground for which the 700 drift is headed and just as soon as it is possible to make room for the men to continue work in the one just encountered, the drift will be continued to a connection with the

## PIOCHE LOOKS GOOD.

### When Big Company Cuts Loose the Camp Will Boom.

Joe S. Free, former superintendent of the E. & F. mines, has returned from a trip to Pioche where, he has been sizing up conditions with a view of one of these the days "pulling cis freight" and making that camp his ermanent headquarters. While the place has been very quiet for the past two or three months, he states that there is now a general belief that good times are

"With the return of General Mon-er George F. Miliken, of the Nevala-Utah company, the other day," said Mr. Free, "the word was passed around loose in vigorous fashion and, from that I learned while there I should say like pounds.

that it ought to. The Meadow Valley shaft has been placed in perfect trim, the old hoisting machinery has been replaced by a new and up-to-date plant and considerable preliminary work has alreadly been done in the mine. I am told that there is simply a world of ore in the lower levels of the property and particularly on the 900; that the company might begin production on an ex-tensive scale at any moment, should the orders from headquarters sanction

"Everybody and everything at camp seems to be waiting on what the big company intends to do. Should it be-gin production and commence laying rails on the road to Callente, the camp would be in to boom immediately. With ore going out from the Meadow Valley and Raymond & Ely mines of the chief-company, it would be no time till a dozen other preparties dozen other properties were adding to

"I have spent five months of this year going through various Nevada camps and in nine of them did I see so much mineral as is to be found in the Pioche

#### MAMMOTH MINE CHANGES.

#### Force of Company Cut Down and Leasing System Introduced.

(Special to The Herald.)

Mammoth. Oct. 14.—Notwithstanding the declaration of Salt Lake officials, the Mammoth Mining company has reduced its working force from about 150 men to forty men, but most of them will go back to work as leasers. The company has decided that as good results have always been obtained from leasers heretofore, certain parts of the mine can be worked to better advantage by leasers. Of course, some of the richest ground is reserved by the company, yet the leasers will have country to work in that will amply repay them.

will have country to work in that will amply repay them.

All work will have to be done in a carefull manner, and the company's timbermen will see that all timbers are put in properly, and nothing in the way of gouging or gophering will be allowed. Leases will be let from top workings as low as the 1.600-foot level.

There will be two shifts operated by the company, and four big machines are to be kept working, one on the 800-foot level, one on the 1.800-foot level and two on the 1.600-foot level, where a large stope of good ore is being opened up.

As it is almost certain that the leasers and hearly all miners who were working in the mine before the change will take leases will make good money, the change

leases will make good money, the change will have leases will make good money, the change will not work any hardship on the town. It is declared that this change in methods is not the result of the supreme court decision last Tuesday. It is stated that the company has had the matter of leasing under consideration for some time.

#### EUREKA HILL LEASES.

#### Management Offers Large Number of Men a Chance at Mine. (Special to The Herald.)

Ine plan for putting up the 2,500-ton concentrating mill for the Boston Consolidated's low-grade ores are now being worked out by Samuel Newhouse, who is in New York conferring with the other

## Ore and Bullion.

Ore and builion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$5\$,000, as follows: Silver, lead, gold and copper ores, \$25,63; base builion, \$22,400. Settlements for the week amounted to \$389,350, the lowest reported in several weeks.

# Metal Markets.

### MINING STOCK EXCHANGE.

# Week Was a Dull One With Single

Exception of Friday. Exception of Friday.

The week on the mining exchange ended on total transfers of stock amounting to 139,556 shares, the market value of which was \$40,003.33. During yesterday's single regular and open board session 11.882 shares sold for \$3,681.39. With the exception of Friday, there was not a day in the week that the market showed any life, and as a result prices were generally weak, especially in the ranks of the lower priced shares.

Friday noticed an improvement, and the prices then made were infantained yesterday. Uncle Sam, which failed, to score during the exchange session yesterday, was sold at some of the brokerage offices as high as 34c a share, and that price was bid for it when business closed.

The finetuations in other stocks have

that brice was but to to closed.

The fluctuations in other stocks have been, for the most part, unimportant, with signs that a better market may prevail during the coming week.

# Utah Stocks in Boston.

James A. Pollock & Co., bankers and brokers, yesterday received over their private wire from Paine, Webber & Co., one of their Boston correspondents, the record of sules of Utah stocks on the Boston market, with range and closing quotations:

New York, Oct. 14.—Activity in coppers continued today, but traders took advantage of high prices and sold stocks all around the room. Boston Consolidated continued to be well bought, the orders coming principally from New York. Money is still tight with very

If you have given up in despair of ever getting a suit to last your boy leven an ordinary length of time, fit him out with a "Hercules-Kantwearout" Shower-proof Suit and tell him to do his worst.

No ordinary pull will tear "Hercules" cloth-no ordinary wrench will break a "Hercules" seam. Ordinary hard wear that will put a common suit out of commission will have no effect on a "Hercules."

If you can find a thread of cotton in "Hercules" fabrics we will give you a "Hercules" suit free. Yarn extra strong, tightly woven—colors will be just as bright the day you sell the suit to the rag man as the day you bought it.

Two linings in coat sleeve where wear is severe-(patent applied for) -only boy's coat made with two sleeve linings. Coat full lined with extra heavy double warped Italian

Takes a mighty stretch of a boy's legs to break a "Hercules" pants seam. Pants full lined with cold shrunk Irish linen-all seams double stitched-seat and inside leg seams covered with tape-pull does not come on seam, but on cloth and lining and they will stand it.

"Hercules" boys' suits are showerproof-shed rain like a tin roof-Moth-proof, Perspiration-proof and thoroughly Hygienic and Sanitary. Unshrinkable materials throughout. Other makers are trying to imitate the "Hercules"—the "Hercules" label proves the genuine.

For boys from 6 to 16-double breasted knee-pants suits only. Five Dollars everywhere. Name of your clothes dealer and age

of your boy and we will send you a "Hercules" free for your inspection

Manager John J. Daly and Director Moylan C. Fox of the Daly-Judge re-turned from a trin to the mine Friday night. Mr. Daly states that he does not know when the mill will be started.

F. A. Keith, general manager, and C. R. Miller, vice president of the Tonopah Mining company, accompanied by Arthur Winslow, a Boston operator, came in from Nevada Friday evening. The party has been touring the different gold camps of the sayebrush state and are stopping off here on their way east.

off here on their way east.

John Murch of Cincinnati, who is a brother-in-law of Manazer Tony Jacobson of the Columbus Consolidated, reached the city yesterday, accompanied by Mrs. Murch. The visitor has a strong notion of making this city his home. He will take in a number of the mining camps during his stay and size up conditions generally.

LA Crizek of the Lost Packer com-

J. A. Czizek of the Lost Packer company came down from the north yesterday morning on miring business requiring his attention in this city. He made an effort to get here in time for the annual meetig of the Lost Packer company, but was detained. However, nothing was done that did not meet his approval, so he is not grieving on that score.

Of conditions at the Lower Mammoth of conditions at the Lower Mammoth Manager John Dern says there has been but little change during the last few days. Drifting south in the ledge on the 1,500-foot level is progressing steadily and the appearance of the ore is such that to see it would convince anybody that it was rich. A trial carload is now on the market, but Manager Dern believes that the best ore is still ahead of the point reached.
